FOR PROFESSIONAL DESIGN

The **Z-fold 8.5" X 11" Brochure**, can offer a fairly inexpensive way for designers
to promote their clients products or services.

The brochure should be folded like a fan, as indicated by the image to the left.

Make sure you stay within the panel and document bounds to ensure text
and artwork is placed correctly.

This .eps should be placed in the picture placement window of a page layout
application such as QuarkXpress or InDesign to act as a guide layer while you
create your brochure.

If you create the brochure in Illustrator for some reason, please make sure
this guide layer is deleted before sending the document to print.

SENDING ARTWORK TO A PRINTER!
